DETAILED ACTION

Allowable Subject Matter

1. Claims 8-11 are allowed.
2. The following is an Examiner's Statement of Reasons for Allowance:

In interpreting the claims, in light of the specification and the applicant's amendments, the Examiner finds the claimed invention to be patentably distinct from the prior art of record. The expanded arguments presented in the appeal brief filed on July 20th, 2005, are found to be persuasive. The prior art does not teach all of the limitations of the independent claim(s) in combination with the other elements presented.

The prior art of record teaches the individual limitations in the claimed subject matter. Facq teaches a database of multimedia experiences provided across a network to clients, while Geibler teaches timeline controlled movie clips, and Janser further teaches a programmable flow of animated interaction.

However, as per claims 8-11, the prior art fails to suggest a reasonable combination of these elements. For example, no reasonable combination of Facq and Janser exists to achieve the programmable distributed movie clip combination claimed. Furthermore, other prior art in the field does not suggest this combination nor do any

individual pieces of art, available at the time the invention was made, teach all of these limitations. For these reasons the claimed invention is distinguishable from the prior art of record.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
